DUTCH EXAM FORMALITIES
OFFICERS**

DELTAPATENTS WELCOMES YOU

Why DeltaPatents?

DeltaPatents is a **patent attorney firm** based in the Netherlands with a passion for quality. We provide the highest quality advice and service to public and private companies at various stages of growth from start-up to Fortune 500. All our patent specialists have a deep technological knowledge and extensive industrial experience at companies like Philips, NXP, ASML, and Dupont/Danisco. Through our education activities, we stay ahead in terms of law changes, case law and procedural requirements.

Our client's needs vary when it comes to patenting routes and level of support needed, and we are able to adapt to their needs and work together with local in-house support staff. This gives us a wide range of knowledge over a broad spectrum of patent procedures.

We are proud to be a leading training organisation for Patent Attorneys for over a decade, offering a complete range of training modules for the European Qualifying Examination – EPC and PCT, and various other IP subjects.

“It was a pleasure to study with such a skilled and nice instructor”

Our **blogs** keep you up-to-date on the EQE, Case law, Patent procedures, Unitary Patent and Dutch IP News.

In 2006 we started **training IP support staff**, culminating in a full training program preparing for the official Dutch Formalities Officers exam. The training modules are now offered throughout Europe.

Our training focuses on giving insight and understanding, and ensuring that the acquired knowledge can be practically applied. Unique for DeltaPatents is that we thoroughly train and guide our tutors. For our tutors, training is a profession, mastered by teamwork and frequent involvement in courses. We take feedback of attendants seriously and act on it. For us, quality and customer satisfaction are essential.

*“Education is not the learning of facts,
but the training of the mind to think”
Albert Einstein*

Through our education activities, we stay ahead in terms of law changes, case law and procedural requirements.

DeltaPatents' personal touch

We believe in teaching and treating candidates with a personal touch. You will be trained in small groups, giving ample opportunity to discuss unclear issues in more detail and get personal assistance.

Hospitality is important to us. For candidates staying in Eindhoven for a couple of days, we aim to organize a social event, such as a dinner or a trip to a local place of interest.

We welcome email contact with our tutors to ask follow-up questions, to clarify course materials or to report mistakes.

IP ADMINISTRATORS

FULL TRAINING PROGRAM

PREPARING FOR THE DUTCH EXAM

FORMALITIES OFFICERS

Objective

The Dutch Exam for Formalities Officers is usually held in May or June each year. The Exam Committee of the Platform Formalities Officers has established a list of knowledge and competences that a certified Formalities Officer is expected to have.

It is necessary to register for the exam via secretariaat@formalitiesofficers.nl and pay a fee.

The fee level is lower if you are a member of the Platform FO.

In co-operation with the Platform, DeltaPatents offers a 9-day full training program in preparation of this Exam, focussing on providing the desired knowledge and competences to the participants.

Who should attend?

IP Administrators and other IP support staff, either from an industrial in-house IP department or from private practice, who wish to obtain in-depth knowledge on several patent aspects and procedures and insight in trademark and design procedures. It is advisable that attendants have some experience in the field of patents. Experience in the field of trademarks and designs is not necessary.

In 2024 we offer on site/online training

We offer this course as on site/online training. Some course days will be on site, at Aristo in Utrecht Lunetten and some course days will be online, using video sessions with the WebEx system. With this system you can interact with the tutor and the other

candidates, ask questions and give answers to the questions of the tutor.

It requires you to have a system with internet connection, a microphone and a speaker (you may wish to consider a headset); preferably you use a laptop or other computer, but WebEx is also available on smartphones and tablets.

For the online training we have divided the topics to be presented in blocks.

Each on site course day will be on a Tuesday, from 09.00 till 17.00 hrs. Every online course day will be split in two half days and will be scheduled on Tuesday and Thursday mornings from 09.00 till 12.30 hrs. The exam training will be on site, on a Tuesday from 09.00 till 17.00 hrs.

Structure and approach

We offer four modules that fully prepare the participants for the Exam Formalities Officers. These modules are:

- General Aspects Patents + Core EPC Procedures (3-day)
- PCT Procedures + Foreign Systems (3-day)
- NL Patent Procedure + Changes of Ownership (1-day)
- Trademarks and Designs (2-day)

In addition to these modules we offer a one-day Exam Training which focuses on giving attendants skills on dealing with the exam – how can you most effectively demonstrate your skills in the time available and score maximum marks. The Exam Training will use the Wiseflow program that is also used for the exam.

It is possible to enrol for the complete series of courses (with or without the optional exam training), or to enrol for separate modules, according to your needs. However, attendants of separate modules should keep in mind that those are part of a full training program and the tutor will make connections to knowledge acquired in previous lessons. Furthermore, subjects may be treated less extensively, to avoid overlap with earlier lessons.

Our focus is to create insight and a thorough understanding of the several procedures. We not only explain what actions should be taken and when, but more importantly why they should be done and how. Our explanations follow the natural course of applications from filing to grant, so as to be consistent with the daily practice of IP Administrators. Additionally, we cover issues during the preparation for filing and after grant.

The information is communicated to participants by presentations using overhead sheets. During each presentation, comprehension of the topics is tested with exercises and cases.

To stay close to daily practice we show some of the forms and official letters of the Patent Offices in our presentations. Furthermore we provide a unique set of flow charts developed by ourselves that explain the various procedures visually. We refer to the Applicant's Guides for further reading. For the EPC module, a booklet is provided with the relevant parts of the EPO Guidelines for Examination and the Applicant's guide. In between the sessions, candidates are required to make homework.

Description of the modules

General Aspects Patents + EPC Procedures (3-day)

Participants will obtain knowledge of 'overall issues' like the priority concept, patent routes and systems, inventor-/ownership, and representation. After attending this module the participant will be able to file a (priority) application and a European patent application (fax and electronic filing), invoke priority and deal with the most occurring issues for getting a filing date, and dealing with the formalities examination. Participants will have a good insight in time limits, remedies (like further processing) and fee payments and will be able to put the knowledge into practice.

Furthermore the participant will have knowledge of the EPC procedure from search to grant as well as of the validation procedure including translations according to the London Agreement and the unitary patent/UPC. The participant will also be able to carry out and monitor the main procedural steps during all these phases.

PCT procedures + Foreign Systems (3-day)

The participant will be able to file a PCT application using the RO/101 form, invoke priority, deal with the most frequently occurring issues for getting a filing date, and deal with both formality and prosecution tasks during the rest of the international phase, EP regional entry and national entry in the US, China, India and Japan. Participants will have a good insight in time limits, remedies and fee payments and will be able to put the knowledge into practice.

Furthermore the participant will be able to perform and monitor the main procedural steps during all these phases.

The IP Administrator will also gain insight in what he/she might encounter during the different national phases like requesting examination, filing of assignment, Power of Attorney, IDS, payment of issue fees, renewal fees, etc.

NL patent procedure + Changes of Ownership (1-day)

The participant will be able to file a NL application (fax and electronic filing), invoke priority and deal with the most occurring issues for getting a filing date, and dealing with the formalities as well as the prosecution of the application procedure, validation of the EP patent in the Netherlands and the procedure for obtaining a Supplementary Protection Certificate (SPC).

Participants will have a good insight in time limits, remedies and fee payments and will be able to put the knowledge into practice.

Furthermore the participant will be able to perform and monitor the main procedural steps during these phases.

Regarding the change of ownership attendants will understand IP rights as property, will be able to establish inventorship and ownership, and will learn what documents are required by the NL Patent Office, EPO and WIPO for registration of a change. The participant will be able to record a change of name or ownership during the PCT International Phase, at the NL Patent Office and at the EPO. Furthermore the

participant will learn how to deal with legalisation and notarisation of documents.

Trademarks and Designs (2-day)

By the end of this session participants will understand the differences between trademarks, designs, domain names and copyright and the different way of thinking compared to patent law. For, different than in patent law, having a trademark and/or design registration does not necessarily mean that rights have been acquired or will remain valid during the registration period. Consequently, participants will acquire knowledge about the filing requirements and understanding of the registration procedure for the Benelux, European and International procedures. Lastly, participants will have an insight in the different filing routes.

Training material

A comprehensive set of high quality, up-to-date training material will be provided including:

- All overhead sheets used during the presentations.

- Unique set of flow charts that visually explain the various procedures, summarize the steps to be taken and show parts of official letters of the Patent Offices

- Cases and questions (open and multiple choice) to assist participants in internalising the information.

Prior training

It is advisable that attendants have some experience in the field of patents. Experience in the field of trademarks and designs is not necessary. Attendants with less experience can first follow the 3-day Introduction to IPR and Patent Procedures course.

Subsequent training

In addition to these modules, we offer a practice day that is planned shortly before the exam. On this day we will practice previous exams and discuss difficulties that course participants have encountered while preparing for the exam.

Course fee full program Formalities Training for the Dutch Exam

Here below you find the course fees of the full program for IP Administrators, preparing for the Dutch exam, consisting of the following modules:

- General Aspects – Core EPC Procedures, price € 1.350
- PCT Procedures – Foreign Systems € 1.380
